
HI THERE, I'M

Brendan Stewart

Software Engineer & Architect

> building full-stack platforms

👋 Welcome! I design and build full-stack platforms, AI tools, and automation that move real businesses forward.

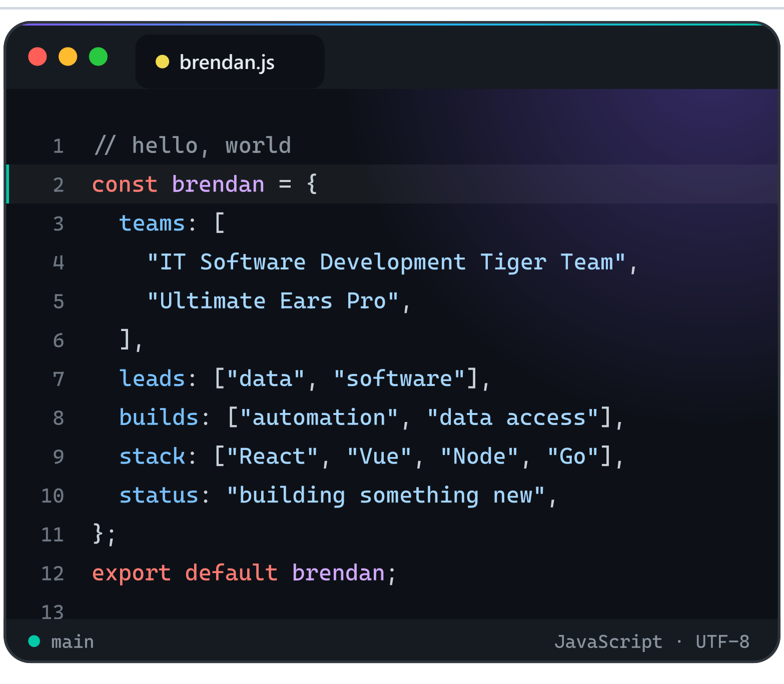
01 About Me

Who I am, where I've been, and what drives me

Hi, I'm Brendan 👋

I am an engineer on Logitech's **IT Software Development Tiger Team**, building software with company-wide impact as well as leading data and software engineering for **Ultimate Ears Pro**.

My path has been anything but typical. I joined Logitech in **2018 on the manufacturing floor** and was promoted numerous times, through **analyst** and then **engineering** roles. Along the way I helped digitally transform businesses with heavy automation, better data accessibility, and thoughtful software.



brendan.js

```
// hello, world
const brendan = {
  teams: [
    "IT Software Development Tiger Team",
    "Ultimate Ears Pro",
  ],
  leads: ["data", "software"],
  builds: ["automation", "data access"],
  stack: ["React", "Vue", "Node", "Go"],
  status: "building something new",
};
export default brendan;
```

EDUCATION

Arizona State University

B.S. Graphical Information Technology · Full Stack Web Development

4.0 GPA

Graduating Fall 2026

02 Technical Skills & Tools

Languages, frameworks, practices and platforms

Languages 8 tools: JavaScript, Go, Java, C++, Python, SQL, HTML5, CSS3

Frontend 5 tools: React, Vue, Three.js, Tailwind, Vite

Backend & APIs 5 tools: Node.js, Express, Flask, REST APIs, Apps Script

Data & BI 8 tools: MongoDB, PostgreSQL, MySQL, SQL Server, Cloud SQL, BigQuery, Data Studio, Tableau

Cloud & Platforms 6 tools: Cloud Run, Vercel, Shopify, Arduino, Git, GitHub

Design 4 tools: Photoshop, Illustrator, InDesign, Canva

🛠 Development Practices

- 🏗 **Full-stack architecture**: React/Vue front ends, Node.js & Go services, REST APIs
- ⚙ **Automation-first**: Apps Script and API workflows that remove manual work
- 📊 **Data-driven delivery**: pipelines from web store to BigQuery, Data Studio & Tableau
- ☁ **Cloud deployment** on Google Cloud Run & Vercel
- 🔍 **Code review & version control** with Git and GitHub
- 🤝 **Mentoring & knowledge sharing** across teams and communities

📜 Certifications

Certification	Issuer
AI Proficiency	Section · ProfAI
Programming in JavaScript	Meta
Machine Learning: From Data to Decisions	MIT
AI & Law *(with Honors)*	Lund University
Ask Questions to Make Data-Driven Decisions	Google
Foundations: Data, Data, Everywhere	Google

03 Featured Projects

A few things I've designed, architected and shipped

FEATURED PROJECT · 01

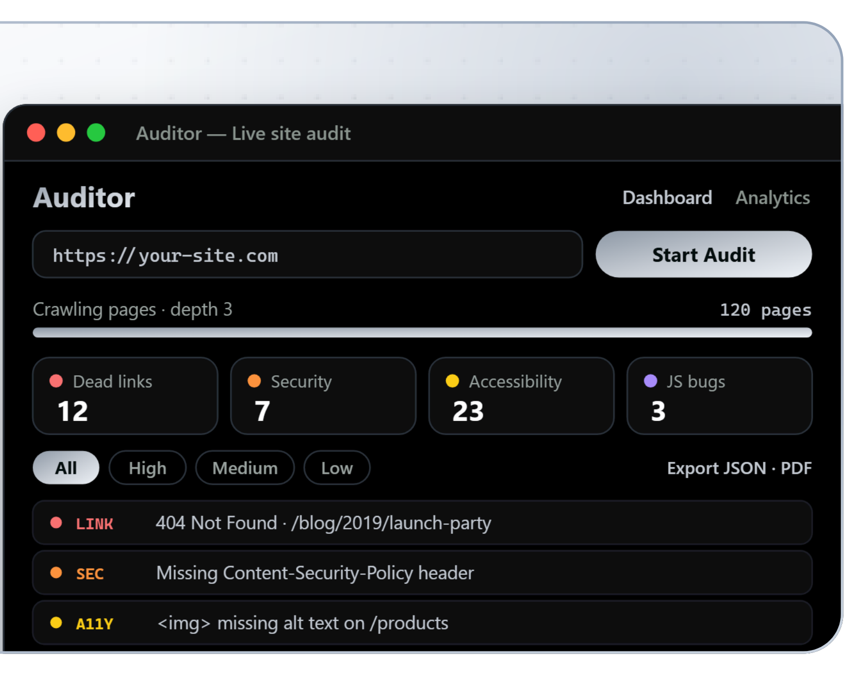
Web Auditor

Full-stack website crawler & auditor

Crawls an entire website and audits every page for dead links, security gaps, accessibility, content quality and live JavaScript errors, with a real-time dashboard and PDF reports.

Python · Flask · Playwright · asyncio · Tailwind

● Open source on GitHub



Auditor — Live site audit

Auditor

https://your-site.com

Crawling pages · depth 3 — 120 pages

Dead links 12 · Security 7 · Accessibility 23 · JS bugs 3

- LINK 404 Not Found · /blog/2019/launch-party
- SEC Missing Content-Security-Policy header
- A11Y <img> missing alt text on /products

🌐 View the source on GitHub →

FEATURED PROJECT · 02

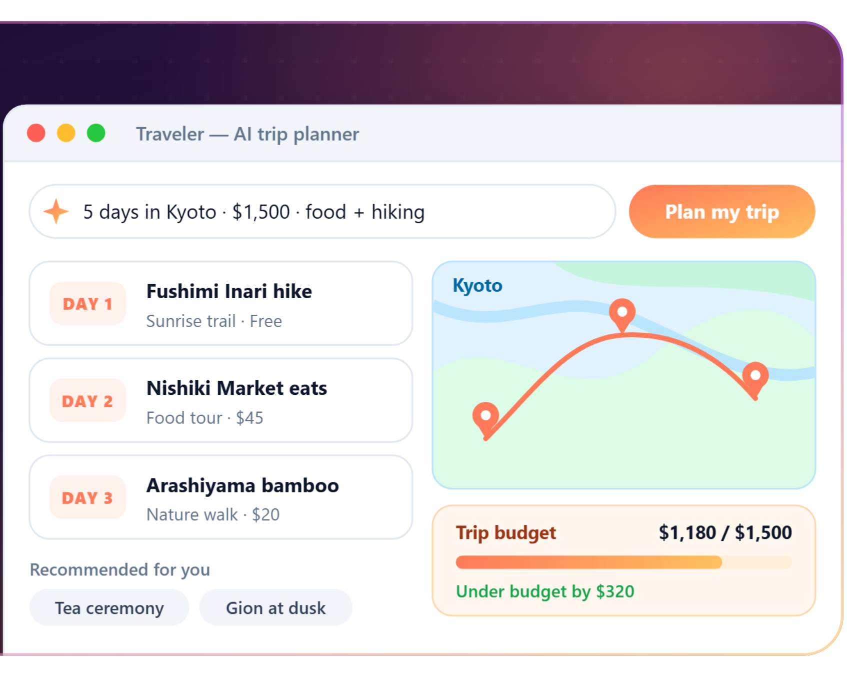
Traveler

Plan an entire trip from a single prompt

An all-in-one AI travel planning assistant that turns one prompt into day-by-day itineraries, budgets, and personalized recommendations, all in one place.

AI itineraries · Budgets · Recommendations

● In active development



Traveler — AI trip planner

5 days in Kyoto · $1,500 · food + hiking

- DAY 1 **Fushimi Inari hike** Sunrise trail · Free
- DAY 2 **Nishiki Market eats** Food tour · $45
- DAY 3 **Arashiyama bamboo** Nature walk · $20

Recommended for you: Tea ceremony · Gion at dusk

Trip budget $1,180 / $1,500

Under budget by $320

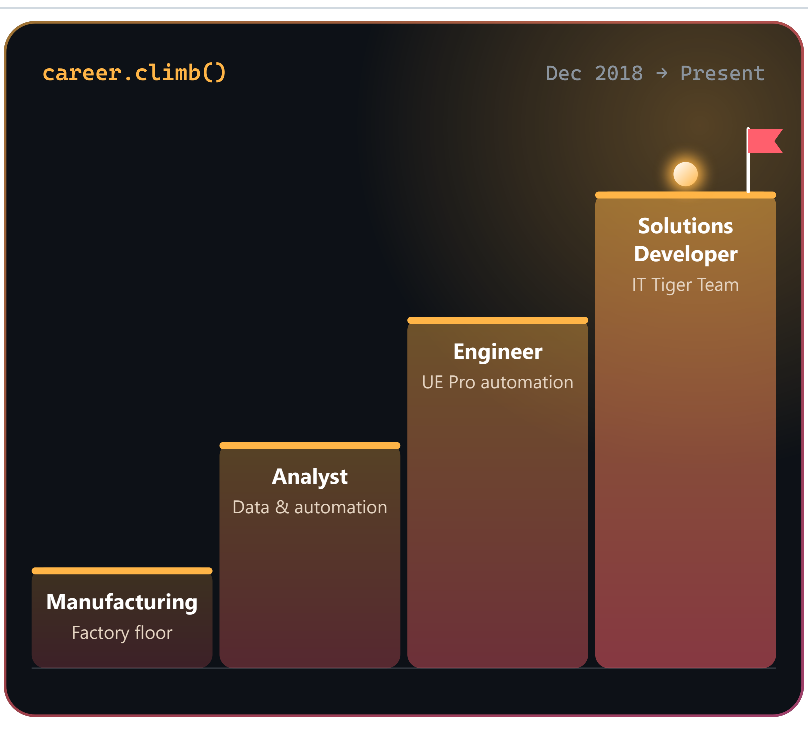
🚧 In active development · Coming soon

04 Experience, Interests & Goals

Where I've grown, what I love, and where I'm headed

💼 Experience

	Role	Organization	Period
logi	**Solutions Developer** IT Software Development Tiger Team	Logitech	Dec 2018 – Present
logi	**AI Champion** Driving AI adoption across the Southern California offices	Logitech · Irvine & Westlake Village	Current
G	**Technical Officer & Mentor** Mentoring the next wave of developers	Google Developer Group	Apr 2026 – Present



🏆 Awards & Honors

Award	Year
🏅 **Employee of the Year** Logitech	2023
✨ **Spotlight Award** Logitech	2022 · 2023 · 2024 · 2026
🐾 **Top Volunteer** K9 Connection	2023

🚀 Impact Highlights: *Led development of...*

🌐 Platforms

- Global on-demand shopping, warehouse & logistics platform for employees and 3rd parties
- Financial operations, vendor assessment, gaming events & internal company tools

🤖 AI

- CLI and AI model router
- B2C web store AI bot and standalone interfaces
- Modular, AI-powered fitment issue tool
- Automations from storage to an AI 3D modeling platform

👁 Vision & Imaging

- QA computer vision models that detect defects down to the millimeter on clear surfaces
- Imaging algorithms and interfaces for operations & manufacturing

🔐 Security & Data

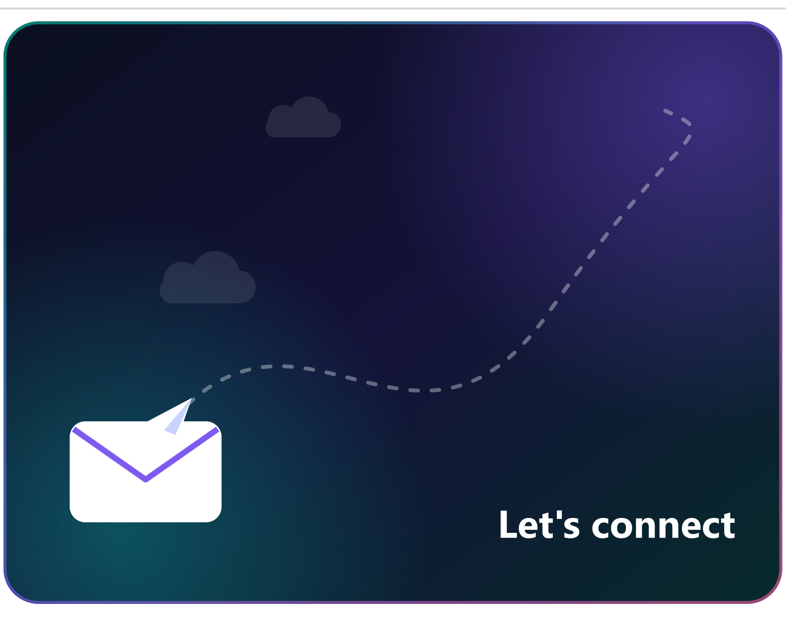
- Self-healing web firewall
- Data pipelines from the web store to visualization tools

🎯 Goals

- 🏛 Grow into a **software architect** designing **AI-native platforms at scale**
- 🌱 Keep **mentoring the next wave of developers** through Google Developer Groups
- ✨ Ship products that blend **great design, data, and engineering**

05 Contact

Get in touch



Let's build something together 🤝

I'm always happy to talk about **full-stack architecture**, **AI tooling**, **automation**, or **mentoring**. Reach out anytime!
